	TOTAL	168	858

Parcels or portions of, with subdivision potential. The number shown on these parcels represents the additional number of parcels that may be created through the subdivision process.

Note: While the accuracy of this map has been extensively reviewed, it is possible that some factors affecting density potential have not been accounted for such as: road dedication, steep slopes, park dedication requirements, covenants, restrictions of the Agricultural Land Reserve, lot depth to width ratio, etc.
