

Air Photo Information

The Islands Trust ecosystem maps were created using air photos taken in 2000 and 2002. The maps identify both natural and modified ecosystems that could be identified the year the air photo was taken.

(*) The line work for the ecosystem mapping of these islands was adjusted and refined based on 2002 digital orthographic photos captured at a scale of 1:25,000 with a resolution of 0.5 meters. All other ecosystem mapping was delineated with digital orthographic photos as a base map.
