

## Abridged Trust Update

Abridged update as this issue falls prior to a number of Trust meetings and events. So here it is, short and sweet:

Your local trust committee met September 26th and placed the following on our work program as the top three priorities: 1) Review of the Community Amenity Density Reserve; 2) Short Term Vacation Rental Review; and 3) Secondary Suite Review. Additional information and proposed courses of action are being prepared by Trust staff and options will be presented for further consideration at our next meeting at 12h30 on November 14th at the Rec Centre.

Of note at the September meeting was the presentation of an Islands Trust Community Stewardship Award to Richard Blagbourne for the renovation of the fog alarm building (see picture). Like many things Saturna does, and thanks to dedicated, creative and committed people like Richard, Saturna has had more than its fair share of these awards. So thanks to Richard and the many volunteers who help (and helped) make the fog alarm building the iconic site that it is today.

A more fulsome update will appear next issue, after your local trustees attend myriad meetings and are also in possession of recommended options for our work program priorities.
